

# BEST THING

WORDS & MUSIC BY STEFANIE STEVEN 2017

I have been searching for you  
and travelled 'round the world  
just to find you was my biggest ever wish

I've been depressed and lonely  
as if I'm left alone  
I thought of quit'n but I choose to carry on

The day I gave up searching you simply walked into my life  
and I'm so grateful for all our happy years

today I'm even more in love  
and I'm proud to be your wife

when I wrote this song for you  
I wiped some tears

you're the best thing on the planet  
that ever happened to me  
you're my rock my key the air I breath  
and you light up a fire in me

I believe that you're an angle  
'cause your touch feels like heaven on earth  
and I will fly with you to the end of the universe

Our love is forever  
and I know that you feel just like me  
we're growing together  
and we're facing the storms and we're living with joy  
yes we're loving to be wild and free

you're the best thing on the planet  
that ever happened to me  
you're my rock my key the air I breath  
and you light up a fire in me
